**Benchmark:** MSCI EAFE C\$  
**Index:** John Hancock Dimensional Developed International Index (CAD Hedged)

### Equity Characteristics

P/E Ratio	11.29
P/B Ratio	1.44
P/CF Ratio	8.03
ROE	19.02%
Average Market Cap	\$44.39B
Dividend Yield	4.32%

### Equity Style Box

The fund's portfolio is biased toward large-cap blend stocks.

### Why invest?

- Targeting a wide range of developed market stocks outside of North America to access the breadth of the market's opportunities
- Seeking to minimize turnover, trading costs, tax liabilities, and cash drag
- Emphasizing factors (smaller cap, lower relative price, and higher profitability) that academic research has linked to higher expected returns

### Performance

#### Growth of \$10,000 since inception

### Calendar Returns (%)

2013	2014	2015	2016	2017	2018	2019	2020	2021	2022

1. Holdings are subject to change. They are not recommendations to buy or sell any security.

Investing involves risks, including the potential loss of principal. There is no guarantee that a fund's investment strategy will be successful. Foreign investing has additional risks, such as currency and market volatility and political and social instability. Large company stocks could fall out of favor, and illiquid securities may be difficult to sell at a price approximating their value. Shares may trade at a premium or discount to their NAV in the secondary market, and a fund's holdings and returns may deviate from those of its index. These variations may be greater when markets are volatile or subject to unusual conditions. Errors in the construction or calculation of a fund's index may occur from time to time. Please see the fund's prospectus for additional risks.

Manulife ETF shares are bought and sold at market price (not NAV), and are not individually redeemed from the fund. Brokerage commissions will reduce returns.

Commissions, management fees and expenses all may be associated with exchange traded funds (ETFs). The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. Investment objectives, risks, fees, expenses and other important information are contained in the ETF facts as well as the prospectus, please read before investing. ETFs are not guaranteed, their values change frequently and past performance may not be repeated.

The payment of distributions is not guaranteed and may fluctuate. If distributions paid by the fund are greater than the performance of the fund, then your original investment will shrink. Distributions should not be confused with a fund's performance, rate of return, or yield. You may also receive return of capital distributions from a fund. Please consult with your tax advisor regarding the tax implications of receiving distributions. See the fund facts as well as the prospectus for more information on a fund's distributions policy.

Distribution yield is calculated based on prior 12-month rolling average of paid distributions and using average month-end net asset value, per security. The distribution yield does not include any year-end capital gains distributions paid in addition to the regular monthly distributions. Distribution yield should not be confused with a fund's performance or rate of return.
