You don't pay these expenses directly. MERs and guarantee fees affect you because they reduce the return you get on your investment. For details about how the guarantees work, see your Information Folder and Contract.

The trailing commission is paid out of the management fee. You don't pay these expenses directly. The rate depends on the sales charge option you choose.

3. Other Fees

Trading Fees apply to all guarantee options and sales charge options and are paid to Manulife.

Frequent Trading Fee	2% of the value of units you trade for switches exceeding 5 per year.

Objective and Strategy

Objective: The Fund seeks for long-term capital growth consistent with protection of capital. The Fund invests the majority of its assets in equity securities of American companies although the Fund's investments are not limited geographically and the Fund will pursue investments in other international markets. The Fund may also purchase fixed income securities if appropriate in relation to economic and market conditions.

Strategy: The portfolio advisor follows a blended value and growth investment style. While the team's focus is on companies which appear likely to have superior and relatively consistent longer term growth prospects, strong consideration is placed on assessing the investment's true worth relative to its stock price. The review process includes analysis of the company's competitive position, management strengths, expected profitability and financial position. The strategy for this fund is available through the Investment Policy Statement (IPS).
