Units Outstanding: 59300000
Positions: 55
Management fee: 0.25%
MER: 0.28% (as at 2024-12-31, includes HST)
Risk: Medium
Ticker: CDIV
NAV per unit: \$20.29 as at March 31, 2026
Benchmark: S&P/TSX Composite
Distribution yield: 2.64%

Equity Characteristics

P/E Ratio	17.01
P/B Ratio	1.90
P/CF Ratio	8.16
ROE	13.22%
Average Market Cap	\$33.88B
Dividend Yield	3.12%

Equity Style Box

The fund's portfolio is biased toward large-cap value stocks.

Why invest?

- CDIV invests in dividend-paying companies in Canada. Investing in dividend-paying companies continues to be an important contributor to total returns and a way to generate income. As investors continue to look for sustainable sources of income in a low interest rate environment, incorporating dividend-payers could be an appropriate portfolio addition.
- CDIV's efficient quantitative approach focuses on companies that pay a consistent and growing dividend over time – not just the highest dividend payers in the market. Their approach screens out companies across market capitalizations, sectors and industries. The portfolio managers also optimize the holding's weights in the portfolio through their research. As a result, CDIV portfolio allocations to different companies will often look very different than the broad Canadian stock indices. This combination of portfolio management techniques also helps to keep costs lower.

1. FundGrade A+® is used with permission from Fundata Canada Inc., all rights reserved. The annual FundGrade A+® Awards are presented by Fundata Canada Inc. to recognize the “best of the best” among Canadian investment funds. The FundGrade A+® calculation is supplemental to the monthly FundGrade ratings and is calculated at the end of each calendar year. The FundGrade rating system evaluates funds based on their risk-adjusted performance, measured by Sharpe Ratio, Sortino Ratio, and Information Ratio. The score for each ratio is calculated individually, covering all time periods from 2 to 10 years. The scores are then weighted equally in calculating a monthly FundGrade. The top 10% of funds earn an A Grade; the next 20% of funds earn a B Grade; the next 40% of funds earn a C Grade; the next 20% of funds receive a D Grade; and the lowest 10% of funds receive an E Grade. To be eligible, a fund must have received a FundGrade rating every month in the previous year. The FundGrade A+® uses a GPA-style calculation, where each monthly FundGrade from “A” to “E” receives a score from 4 to 0, respectively. A fund’s average score for the year determines its GPA. Any fund with a GPA of 3.5 or greater is awarded a FundGrade A+® Award. For more information, see <http://www.FundGradeAwards.com>. Although Fundata makes every effort to ensure the accuracy and reliability of the data contained herein, the accuracy is not guaranteed by Fundata.
2. Holdings are subject to change. They are not recommendations to buy or sell any security.

Investing involves risks, including the potential loss of principal. There is no guarantee that a fund’s investment strategy will be successful. Foreign investing has additional risks, such as currency and market volatility and political and social instability. Large company stocks could fall out of favor, and illiquid securities may be difficult to sell at a price approximating their value. Shares may trade at a premium or discount to their NAV in the secondary market, and a fund’s holdings and returns may deviate from those of its index. These variations may be greater when markets are volatile or subject to unusual conditions. Errors in the construction or calculation of a fund’s index may occur from time to time. Please see the fund’s prospectus for additional risks.

Manulife ETF shares are bought and sold at market price (not NAV), and are not individually redeemed from the fund. Brokerage commissions will reduce returns.

Commissions, management fees and expenses all may be associated with exchange traded funds (ETFs). The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. Investment objectives, risks, fees, expenses and other important information are contained in the ETF facts as well as the prospectus, please read before investing. ETFs are not guaranteed, their values change frequently and past performance may not be repeated.

The payment of distributions is not guaranteed and may fluctuate. If distributions paid by the fund are greater than the performance of the fund, then your original investment will shrink. Distributions should not be confused with a fund’s performance, rate of return, or yield. You may also receive return of capital distributions from a fund. Please consult with your tax advisor regarding the tax implications of receiving distributions. See the fund facts as well as the prospectus for more information on a fund’s distributions policy.

Distribution yield is calculated based on prior 12-month rolling average of paid distributions and using average month-end net asset value, per security. The distribution yield does not include any year-end capital gains distributions paid in addition to the regular monthly distributions. Distribution yield should not be confused with a fund’s performance or rate of return.
